RAGHAVENDRA REDDY THUMMALA (Experience 12 Years)

Email : raghava.r4u@gmail.com
Phone : +91 9703449527 / 9673009527
Languages : English, Hindi, Telugu

Snapshot

- ✓ My expertise lies primarily in Data Science, with significant experience in Data Engineering.
- ✓ I have worked on a wide range of projects, including Agentic AI, GenAI, NLP, ML, Azure and AWS Cloud, databases, and Big Data initiatives
- ✓ Sufficient knowledge and work experience on ML-Ops
- ✓

Work Experience

TAO Digital -- Hyderabad
Tech Lead (Data - AI/ML)
April 2024 – Present (1 year 1 month)
Worked on: GenAI, LLM, RAG, Vector DB, Terraform, Graph DB, AWS, OCR

Turing --Remote
Machine Learning Engineer
Aug 2021 – Feb 2024 (2 Years 6 Months)
Client (Johnson & Johnson)
Worked on: GenAI, LLM, RAG, Vector DB, Terraform, Graph DB, AWS, OCR

Virtusa – Chennai & Bangalore
Associate Consultant -- Client (Cisco)
Nov 2018 – Aug 2024 (2 Years 10 Months)

Worked on: GenAI, LLM, RAG, Vector DB, Terraform, Graph DB, AWS, OCR

Hydus - Hyderabad
Business development executive
Nov 2018 – Aug 2024 (2 Years 10 Months)

Immo Info Tech
Jr Statistician
Nov 2018 – Aug 2024 (2 Years 10 Months)
Worked on: GenAI, LLM, RAG, Vector DB, Terraform

Tech Stack (Strengths are left to right)

Data Storage / Processing:
ORACLE PL SQL, Microsoft SQL Server, MySQL, aws, snowflake, neo4j, databricks, Azure

Languages
python, R

Data Preprocessing & transformations
learn, PySpark

DevOps
git, Bitbucket, kubernetes, Jenkins, tableau, Terraform, docker

Cloud

ML Packages
PyTorch, Keras, TensorFlow, LangChain, OpenCV

API
FastAPI, Flask

Visualizations
mlflow, Streamlit, Amazon Cloudwatch, Grafana

AI/ML Stack

ML: Statistical ML **(Random forest ,XGB**
NLP
DL
GenAI

Education

PGDM - ISTTM (ICT Management)
(Oct 2011 – Aug 2013)

B-Tech -- JNTU -Kakinada
ECE (Oct 2011 – Aug 2013)

Intermediate – MPC - Sri Chaitanya Jr college
(Oct 2011 – Aug 2013)

SSC - Sri Vani Niketan
(Oct 2011 – Aug 2013)

DOB 26-07-1990

Area of Interest

- AI & ML
- Supply chain
- Research
- Digital Marketing
- Telecom

Personal Skills

- Learning new things
- Quick learner
- Optimistic
- Presentation Skill
- Self-Motivated

Projects

TAO Digital:

- ✓ **Digitizing the magazine archive** using *OCR*, *GenAI*, and document segmentation for content extraction and metadata enrichment
- ✓ **Video transcription and analytics** with format conversion, speaker detection, subtitles, celebrity recognition, and GenAI for metadata extraction.
- ✓ **Conversation AI:**
- ✓ **SP Migration**:
- ✓ **Terraform Automation:**

.

Turing:

- ✓ **Smart Reader Project**: Integrated Intelligent Document Classification (iDoc), OCR, Barcode Decode (QR, Data Matrix), Form Recognizer, and Language Translation using Azure and Google services for automated document processing and form recognition. Utilized NER for categorizing entities like names, organizations, and dates within documents.

- ✓ **OTIF**: Applied SMOTE and machine learning models (Random Forest/XGB) for OTIF multiclass classification, addressing imbalanced data, and used SHAP/LIME for model interpretation.

- ✓ **Text Summarization**: Employed LLM models for abstractive text summarization and compared results with ChatGPT outputs.

- ✓ **AISI (Artificial Intelligence Smart Image Platform) (POC)** – Object detection on medical lunar kits using Faster R-CNN.

Wipro

OCP – Reduces revenue loss early by predicting order cancellations and identifying the phase of cancellation, improving customer satisfaction.

Predictive Analytics: Cisco Supplier Negotiations – Analysed cost discrepancies between actual and forecasted values at component, product, and supplier levels using data from JSON, API, DB, and Hadoop.

Virtusa

Value Engineering (VE) optimizes cost reduction across the product lifecycle through component replacement, redesign, and minimizing new product conflicts. Worked on financial metrics (Spend, Savings, ROI, PBP) and ad-hoc reports and dashboards.

Digital Campaign Analytics – Managed campaign data by creating data flow diagrams and analysing campaign performance. Worked on email, web, social, and paid media metrics.

Immo Infotech

Hedonic Price Models -- The OCP project helps to reduce potential loss of revenue at an early phase, thereby improving customer satisfaction. Objective is to identify whether the order would get cancelled or not & Prediction of phase at which order could be cancel.
